1056. Effect of heparin on development of experimentally induced atherosclerosis (Russian text) ZISKO A. P. Inst. of Ther., USSR Acad. of Med. Scis, Moscow Byull. eksper. Biol. i Med. 1958, 45/5 (29-33) Graphs 3 Tables 1

Single administrations of heparin in various doses to rabbits with alimentary hypercholesterolaemia lowered the cholesterol and lecithin levels in the blood to the same degree. The value of the lecithin/cholesterol coefficient remained almost unchanged. Prolonged administration of heparin in low dosage to rabbits fed cholesterol had no effect on the degree of atheromatosis of the aorta or on the blood lipids. Prolonged i.v. treatment with large doses of heparin (90 and 60 mg.) inhibited the development of aortic atherosclerosis in rabbits but had no definite effect on the levels of the plasma lipids. (11, 6, 18, 20)

AUTHOR: Zislin, S.G. SOV-113-58-9-2/19

TITLE: Further Comments on Standards For the Drafting System.
(Yeshche raz o standartakh na sistemu chertechnogo knozyaystva)

PERIODICAL: Avtomobil'naya promyshlennost', 1958, Nr 9, pp 3-6 (USSR)

ABSTRACT: The author, together with S.N. Inozemtsev, criticized the GOST 5290-50-5302-50 standards for the system of drafting economy as early as 5 years ago. A project of new standards on the same subject has been worked out by the Leningradskiy filial proyektno-tehnologicheskogo instituta (Leningrad Branch of the Technological Planning Institute) and is reviewed by the author, who thinks that a great many points should be changed. The requirements of the automobile industry in the drafting sector are not considered, nor has attention been paid to the value of the motor vehicle plants' 30 years of practical experience. It is pointed out that the country's leading motor vehicle plants, such as GAZ, ZIL, MZMA, those in Ul'yanovsk, Minsk and other places, utilize effective methods in the drafting sector. The author urges the institute to issue a new project with the criticized points eliminated.

3611. ZISLINA N.N. * Electrophysiological study of functional flexibility of the brain in children by the method of rhythmic luminous stimulation (Russian text) Z. VYSC. NERV. DEJATEL. 1955, 5/5 (677-685) Graphs 5

In 64 children aged 9-16 yr. the electrical activity of the cerebral cortex on stimulation with light flashes was studied. In 85% of healthy children the cortical rhythm changed in response to the flicker when the frequency of the latter was between 8 and 24 per sec. This was seen especially in the α rhythm, which corresponded more or less to the frequency of the stimulus in this range. With a lower frequency of flicker (3-6 per sec.) no true synchronization occurred. A remarkable fact is that in many children the EEG waves were doubled or trebled with respect to the rate of flicker. These peculiar changes in neuronal activity were also observed in sleeping children. It is concluded that the registration of EEGs with flicker stimulation in children opens up new prospects for research.

SOV/6246

Soveshchaniye po tsseolitam. 1st, Leningrad, 1961.

Sinteticheskiye tsseolity; polucheniye, issledovaniye i primeneniye
(Synthetic Zeolites: Production, Investigation, and Use). Mos-
cow, Izd-vo AN SSSR, 1962. 286 p. (Series: Its: Doklady)
Errata slip inserted. 2500 copies printed.

Sponsoring Agency: Akademiya nauk SSSR. Otdeleniye khimicheskikh
nauk. Komisiya po tsseolitam.

Resp. Eds.: M. M. Dubinin, Academician and V. V. Serpinskiy, Doctor
of Chemical Sciences; Ed.: Ye. G. Zhukovskaya; Tech. Ed.: S. P.
Golub'.

PURPOSE: This book is intended for scientists and engineers engaged
in the production of synthetic zeolites (molecular sieves), and
for chemists in general.

Card 1/~~10~~ 3

Synthetic Zeolites: (Cont.)

SOV/6246

COVERAGE: The book is a collection of reports presented at the First Conference on Zeolites, held in Leningrad 16 through 19 March 1961 at the Leningrad Technological Institute imeni Lensovet, and is purportedly the first monograph on this subject. The reports are grouped into 3 subject areas: 1) theoretical problems of adsorption on various types of zeolites and methods for their investigation, 2) the production of zeolites, and 3) application of zeolites. No personalities are mentioned. References follow individual articles.

Stroyeniye Atomogo Yadra (Structure of the Atomic Nucleus), by
Grigorij Abramovich Zisman, sponsored by the Society for the
Dissemination of Political and Scientific Knowledge RSFSR,
Leningrad, 1956, 52 pp

This work discusses nuclear structure under the following chapter headings:
Units of Measurements, Mass and Energy, Elementary Particles, Proton-Neutron
Transmutations, Nuclear Forces, Stability of Nuclei and Radioactive Trans-
mutations, The Liquid Drop Model, The Number of Possible Isobars, Fission
of Heavy Nuclei and Limiting Dimensions of Atomic Nuclei, and Nuclear Shells
and Magic Numbers.

The account is essentially nonmathematical; explanations are given in
terms of elementary concepts. The sections on the shell and liquid drop
models are quite detailed and comprehensive; the inadequacies of each are
pointed out. The booklet concludes with the statement: "The atomic nucleus
is still waiting for its Mendeleev." (U)

SOV/3764

Zisman, Girsh Abramovich, and Oskar Movshevich Todes

Kurs obshchey fiziki. t. 2: Elektrichestvo i magnetizm. (Course in General Physics. vol. 2: Electricity and Magnetism) Moscow, Fizmatgiz, 1959. 344 p. 25,000 copies printed.

Ed.: V.I. Rydnik; Tech. Ed.: S.S. Gavrilov.

PURPOSE: This is the second volume of the textbook series on general physics for the physics course in schools of Higher technical education.

COVERAGE: This volume is divided in three parts: Electrostatics, Electrical Current, and Electromagnetism. pars. 1, 2, 5-27, 52-54 and the appendixes were written by Professor O.M. Todes, pars. 3, 4, 28-51 by Docent G.A. Zisman. The authors thank the members of the Physics section of the Leningrad House of Scientists (LDU) for their comments. There are no references.

Kurs obshchey fiziki. T. 1: Mekhanika, molekulyarnaya fizika, kolebaniya i volny (Course of General Physics. Vol: Mechanics, Molecular Physics, Oscillations and Waves) Moscow, Fizmatgiz, 1958. 330 p. 25,000 copies printed.

Ed.: V. I. Rydnik; Tech. Ed.: S.S. Gavrilov.

PURPOSE: This is a textbook of elementary physics for students attending vuzes and vtuzes.

COVERAGE: This is the first volume of a three-volume elementary physics textbook. The text is to be studied over a period of three semesters. The first volume includes the principles of mechanics, molecular physics, and thermodynamics, as well as the physics of real gases, fluids, and solids, and finally, oscillations, waves, and sound. The first volume was reviewed by the Physics Department of the Leningradskiy Dom uchenykh (Leningrad House of Scientists), as well as by Professor G.S. Kvater, of Leningrad University, reviewer for the Publishing House. There are no references.

TABLE OF CONTENTS:

Preface	6
Introduction	9
PART I. PHYSICAL PRINCIPLES OF MECHANICS	
Ch. I. Kinematics of a Point	14
1. Material point. Frames of reference	14
2. Velocity and acceleration of a moving point	17
Ch. II. Laws of Dynamics	23
3. Newton's Laws	23
4. The law of conservation and change of momentum (impulse). Re-active motion	29
5. The work of forces and kinetic energy	34
6. Potential energy. Law of conservation and conversion of energy	38
7. Potential energy of gravitation and elastic strains	42
8. Point of impact of balls	46
9. Limited applicability of the laws of classical mechanics	51

Card 2/7

Course of General Physics (Cont.)

SOV/1490

Ch. III. Rotation of a Solid Body Around a Stationary Axis	55
10. Kinematics of rotation	55
11. Dynamics of rotation	58
Ch. IV. Fluids in Motion (Hydro and Aerodynamic Principles)	65
12. D. Bernoulli's equation	65

PART II. PRINCIPLES OF MOLECULAR PHYSICS AND THERMODYNAMICS

Ch. V. Basic Concepts of the Kinetic Molecular Theory	71
13. Introduction. Experimental basis of the kinetic molecular theory	71
14. Experimental gas laws. The Mendeleyev-Clapeyron equation	76
15. Chaotic state of molecules in motion	81
16. Statistical laws. Distribution of molecules by volume	84
Ch. VI. Kinetic Molecular Theory of an Ideal Gas	91
17. Average velocity of molecules. Flow of molecules	91
18. Basic equation of the kinetic theory of gases	95
19. Temperature and methods for measuring it. Absolute zero	100
20. Velocity of molecules of a gas. Maxwell distribution law	103

Card 3/7

Course of General Physics (Cont.)

SOV/1490

21. Gas in the field of gravitation. Barometric formula	109
22. Perrin's experiments. Determination of Avogadro's number	113
23. Brownian movement	117
Ch. VII. Migration Phenomena in Gases	
24. Migration phenomena	120
25. Number of collisions and length of the free path of molecules in a gas	120
26. The vacuum. Methods of creating and measuring it	122
27. Diffusion of gases	127
28. Viscosity of a gas (internal friction)	129
29. Thermal conductivity of a gas	131
30. Migration coefficients and their dependence on pressure	135
	138
Ch. VIII. First Law of Thermodynamics	
31. Work and heat. First law of thermodynamics	142
32. Specific heat of a gas. Physical meaning of the universal gas constant	142
33. Specific heat of monatomic and polyatomic gases	146
34. Processes and cycles of gas and their graphic representation	149
	157

Card 4/7

Storing sugar beets for a long period. A. M. POKORNICHUK AND G. S. ZINMAN.
Nauk. Zapiski Tadzhik. Fiz.-Tekhn. Inst., 21-2, 45-50 (1982). In order to prolong the beet storage
mfg. season, the beets were stored in the field. Beets piled and covered by earth alone
gave the best results. Daily losses of sugar were less in winter than in autumn. The
losses of sugar in beets increase in early spring when the weather is very changeable.
Treatment of beets with fumes of SO₂ prevents deterioration of sugar in the beets during
storage.
